

# Conditions for Granting the No AI Declaration™ Mark – Category No. 11: Education and Training

---

Version 1.1 | effective as of: 16 July 2025

## 1. General Introduction

**No AI Declaration™** is a public statement by an individual or company that, within a specific area of activity, **it does not use artificial intelligence (AI) tools.**

The declaration is public, open, and entered into the No AI Movement™ register. Each granted declaration receives a unique identification number and is cryptographically anchored (hash) in a selected blockchain network, which enables independent confirmation of its integrity and issuance date (details in the No AI Movement™ technical specification).

The category “Education and Training” applies to the creation, delivery, and evaluation of educational processes, including learning materials, courses, workshops, trainings, webinars, lectures, presentations, examinations, competency assessments, and individual or group instruction.

Within this category, the declarant confirms that **the educational content, instructional method, explanations, interpretations, and evaluation are based on human knowledge and decision-making**, and are not generated or suggested by artificial intelligence (AI) systems.

## 2. Definitions

### **Artificial Intelligence (AI)**

Software systems or computational models using machine learning, recommendation algorithms, generative language models, or automated classification to create, analyze, evaluate, or suggest educational content or assessment outcomes.

### **Educational Process (within the meaning of this category)**

The planning and delivery of instruction, including selection of content, examples, explanations, exercises, and methods of evaluation — carried out intentionally and responsibly by a human instructor.

### **Educational Material**

Texts, presentations, recordings, exercises, tests, assignments, graphics, lessons, and any instructional resources provided to learners.

### **AI Component (Prohibited)**

Any tool that generates, suggests, modifies, or evaluates educational content, influencing the substance, structure, or outcome of the learning process.

## 3. General Rules for the Category “Education and Training”

The No AI Declaration™ mark may be granted only if:

- educational content was created by a human,
- instruction is led by a human teacher, instructor, or trainer,
- explanations and interpretations are based on human knowledge and experience,
- exams, tests, or assignments are evaluated by a human,
- no AI systems generate, analyze, or recommend content or evaluation outcomes.

The declarant confirms that materials were not:

- generated by AI,
- drafted via prompts,
- modified or refined by generative systems,
- automatically composed or restructured by AI-based tools.

## 4. Typical AI Uses in Education (Prohibited)

The following uses **are not permitted** under this category:

- generating lesson plans, scripts, textbooks, or presentations using AI,
- automatic creation of tests, quizzes, answer keys, or solution explanations,
- AI-based grading or evaluation of student work,
- systems that analyze learner behavior to suggest instructional content,
- generating examples, definitions, or interpretations based on prompts.

Interpretation principle:

**If a tool influences the content or its evaluation, it is not allowed.**

## 5. Permissible AI Applications – Applicable to All Categories

AI may be used in areas **that do not affect the content, form, or execution of the work covered by the declaration.**

Permissible applications include:

- education and self-learning (e.g. studying theory, history, techniques, and concepts related to the given field of activity),
- searching for information and inspiration (e.g. obtaining source data, auxiliary materials, examples, comparisons, trends),
- organizational and technical support (e.g. work planning, file management, provided it does not affect the content of the work/service),

## 6. Permissible Use of AI – Category: Education and Training

AI may be used **only** for:

- administrative and organizational functions (scheduling, enrollment, certificates, notifications),
- playback or display of content previously created by humans,
- file archiving and documentation management,
- technical automation that does **not** affect instructional substance.

AI must *not*:

- create or suggest educational content,
- evaluate learning outcomes,
- conduct lessons, discussions, or Q&A sessions in place of a human instructor.

## 7. Final Remarks

The fundamental principle of this category is:

**The teacher or trainer must be the source of knowledge — not AI.**

If any part of the content or evaluation was generated, suggested, or graded by AI, the process does **not** meet the requirements of this category

.

## 8. Conditions for Granting the Right to Use the No AI Declaration™

### Mark

- Educational content was developed by a human.
- Instruction and evaluation are conducted by a human.
- AI tools do not influence content or assessment outcomes.
- The declaration applies to **specific materials, courses, or training programs**, not to all operations of the organization.

## 9. Procedure for Obtaining the Right to Use the No AI Declaration™

### Mark

- reading this document,
- completing the online form,
- submitting a statement of compliance with the conditions,
- receiving a declaration number and PDF document,
- entry into the public register of No AI Movement™ declarations.

## **10. Rules for Using the No AI Declaration™ Mark**

- The mark must be used in its original form, with preservation of clear space; it may not be combined with other marks into a single composite mark.
- The digital version of the mark should link to the entry in the public declaration register.
- It is prohibited to suggest that No AI Declaration™ is an official or governmental certificate.

## **11. Verification and Responsibility**

Declarations may be verified randomly or in the following cases:

- suspected abuse,
- public violation of the rules,
- changes in the way the activity covered by the given category is conducted.

In case of violation:

- in minor cases, No AI Movement™ may issue a warning and corrective period (7–14 days),
- in cases of material or repeated violation, the declaration may be suspended or revoked with immediate effect,
- the declarant has the right to appeal within 14 days; the appeal is reviewed by the No AI Movement™ verification team.

The declarant undertakes to inform the organizer of any material changes and to cooperate during possible verification.

**No AI Declaration™**

*Document developed under the No AI Movement™ system.*

*All rights reserved. Copying, processing, or public distribution of the content without the author's consent is prohibited.*

*The name and mark No AI Declaration™ are protected as brand designations.*
