# Conditions for Granting the No AI Declaration™ Mark

---

## Category 1: Creators and Artists / Subcategory: Animation

Version 1.1 | effective from: 16.07.2025

### 1. Introduction

This document is a supplement to the general conditions of Category 1 "Creators and Artists" and defines specific rules for the subcategory Animation. All provisions of the main Category 1 document apply, complemented by the conditions set out below.

### 2. Typical AI Applications (Prohibited)

Within the Animation subcategory, the following uses of AI are considered prohibited, among others:

- generating animated sequences, characters, backgrounds, or special effects using AI systems,
- automatic creation of storyboards, animation scripts, or motion choreography by AI,
- creative transformation of animation materials (e.g., significant modification of character movement, adding scene elements, simulating physics),
- using animation tools with AI modules that autonomously create artistic content or interfere with scene composition.

Clause: the above list is illustrative and not exhaustive.

### 3. Permissible AI Applications (Auxiliary)

AI may only be used for technical and organizational purposes that do not affect the content or artistic value of the animation, in particular:

- cataloguing files and assigning metadata,
- automatic technical rendering (e.g., optimization of computing time, format conversion),
- noise reduction, motion stabilization, or frame quality improvement – provided these are deterministic processes,
- organizational support in the animation production process (e.g., managing object libraries, scheduling).

### 4. Specific Rules for the Animation Subcategory

- The creative process, including designing, drawing, modeling, and animating, must be entirely human-made.
- Works generated or co-created by AI may not be presented as covered by the declaration.
- AI tools may only serve auxiliary roles – technical and organizational.
